WORK EXPERIENCE

Lockheed Martin – *Strategic Operations Analyst*

August 2026 - Present

- Developed object-oriented AFSIM software models for mission, theater, and campaign-level simulations.
- Designed, integrated, tested, and debugged simulation software to evaluate advanced defense system performance.
- Built software tools to analyze complex simulation data and support operational decision making.

General Atomics Aeronautical Systems – *Data Engineering Intern*

June 2025 - August 2025

- Designed and deployed an Azure-based data pipeline (SQL, ETL) integrating legacy systems for UAV sustainment ops.
- Automated Python and SQL workflows, eliminating over 1,800 annual labor hours and enabling real-time reporting.
- Built ML-based document parsing system reducing technical lookup time by over 40%.
- Improved data reliability and query performance through schema design and pipeline optimization.

Renewable Energy Place (REplace) – *Software Engineering Intern*

June 2024 - August 2024

- Built and shipped full-stack features (React, Node.js, PostgreSQL) for a production renewable energy platform.
 - Designed geospatial data pipelines (GeoPandas, Mapbox) to process statewide energy datasets more efficiently.
 - Contributed to v2.0 platform launch enabling enterprise client onboarding.
 - Collaborated in Agile environment with code reviews, version control (Git), and sprint-based delivery.
-

PROJECTS

Custom Programming Language – *Racket*

github.com/spaykel/zode

- Built a custom programming language including parser, interpreter, and runtime system.
- Implemented lexical scoping, evaluation strategies, and multiple execution models including typed/untyped and mutable/immutable language variants.
- Demonstrates strong foundation in compilers, systems, and language design.

Chess Artificial Intelligence Solver – *Python w/ Tensorflow*

github.com/spaykel/AI_ChessEngine

- Built a chess engine using Monte Carlo Tree Search (MCTS) with neural network evaluation.
- Optimized recursive search and pruning strategies to improve performance and reduce computational cost.

Event Finder Mobile App – *React Native, Spring Boot, MySQL*

- Built a full-stack mobile app for real-time, location-based event discovery.
 - Designed REST APIs and backend systems for user-generated content, moderation, and dynamic querying.
 - Implemented geolocation-based filtering and ranking for personalized user experience.
-

LEADERSHIP

Hack4Impact Cal Poly – *Director of Operations, Product Manager, & Developer*

September 2023 - June 2026

- Led cross-functional teams (10+) delivering software solutions for nonprofit clients.
- Managed execution across 11 concurrent projects, including planning, prioritization, and delivery timelines.
- Oversaw budgeting, fundraising, and stakeholder coordination.
- Contributed to full-stack development and system improvements.

Sigma Phi Delta Fraternity – *Treasurer*

May 2025 - May 2026

- Manage a \$50,000+ annual budget as a member of the executive board for a 75+ member organization.
 - Oversee dues collection, financial planning, and transparent reporting to support chapter operations and decisions.
-

EDUCATION | California Polytechnic State University, San Luis Obispo (Cal Poly)

Bachelor of Science in Computer Science with Entrepreneurship Minor

June 2026

- GPA: 3.78 / 4.0 | *Magna cum laude* | Dean's List (10x) | President's List (2x)
-

SKILLS

Languages: Python, Java, C/C++, JavaScript/TypeScript, SQL

Frameworks/Libraries: React, Node.js, Spring Boot, TensorFlow, Pandas, NumPy

Tools/Technologies: Git, PostgreSQL, REST APIs, Selenium
